NAO Sustainable Europe (The "Sub-Fund") is a sub-fund of Protea Fund (the "Fund")

Discount (the "Class") – ISIN (LU1904671127)

The Fund has appointed FundPartner Solutions (Europe) S.A. as management company.

OBJECTIVE AND INVESTMENT POLICY

The objective of the Sub-Fund is to achieve capital appreciation over the medium and long-term, offered through an exposure to the equities markets, while giving due consideration to environmental, social and governance ("ESG") criteria.

The Sub-Fund will invest at least 75% of its net assets in equities and equity-like securities issued by companies:

- With a suitable ESG profile, as determined by the Investment Manager; and
- Which are listed on the stock exchanges of European countries within the Organisation for Economic Cooperation and Development ("OECD");
- Which are domiciled, headquartered or exercise the predominant part of their economic activity within European countries (for the sake of clarity including the United Kingdom and Switzerland) which are part of the OECD, Japan and the United States.

Except the geographical restriction and the focus on the ESG criteria, the choice of investments will not be limited by an economic sector or by the currency in which investments will be denominated. However, depending on market conditions, a particular focus can be placed on a single country and/or on a single currency and/or on a single economic sector.

The remaining assets can be invested in the following financial assets (which will not follow necessarily the ESG criteria): money market instruments, cash and equivalents; undertakings for collective investment (UCIs); financial derivative instruments.

However the Sub-Fund will not invest more than 10% of its net assets in UCIs.

For hedging and for any other purposes, the Sub-Fund may use all types of financial derivative instruments traded on a regulated market and/or over-

the-counter. However, the Investment Manager intends to use principally options and/or futures on equities and currency financial derivatives.

If the Investment Manager considers this to be in the best interest of the shareholders, the Sub-Fund may also hold, on a temporary basis and for defensive purposes, up to 100% of its net assets, in liquidities as among others cash deposits, money market UCIs (within the 10% limit above-mentioned) and money market instruments.

RISK AND REWARD PROFILE

Risk Disclaimer

- This current risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category, which corresponds to Number 1, cannot be regarded as being risk-free.
- The Sub-Fund does not provide any capital guarantee or asset protection measures.

Why is this Sub-Fund in this Category?

The portfolio of this Sub-Fund consists essentially of equities or equity related securities with a suitable environmental, social and governance profile. The objective of the Sub-Fund is to achieve capital growth by using equity-linked investment strategies. Hence, the risk/reward profile of the Sub-Fund should correspond to a High risk category on the risk/reward scale.

Are there any other Particular Risks?

Risks that could affect fund performance and are not necessarily fully reflected in the risk and reward rating include:

- Liquidity risks: The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.
- Counterparty risks: The Sub-Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.
- Credit risks: The Sub-Fund may not invest in debt securities. The issuers of these debt securities may become insolvent, which will mean that the securities will lose all or some of their value.
- Risks from the use of derivatives: The Sub-Fund may use financial derivatives instruments which may result in the Sub-Fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Sub-Fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Sub-Fund being exposed to a greater loss than the initial investment.

- Operational risks: The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the management company or by external third parties or may be damaged by external events, such as natural disasters.
